LINGUA

Nowadays, the **Gabinetto dei Disegni** of the **Sforza Castle** holds over thirty thousand works on paper from the 15th to the 20th century which include designs, figurative studies, and architectural and ornamental projects. Among the masterpieces are works by **Leonardo da Vinci**, **Tiepolo**, **Appiani**, **Previati**, **Boccioni**, **Modigliani** and significant core collections such as that of the architect **Luca Beltrami**.

This very first **Guide** traces the Gabinetto's backstory, from its 19th-century origins to the most recent developments, through the figures who shaped the institute – from Carlo Vicenzi and Giorgio Nicodemi to Mercedes Garberi – to bring us this unique civic collection which continues to grow and reinvent itself.

A journey into the **graphic memory of the city**, among tales of collectors, artists and institutions who have all chosen to share that most essential form of art, drawing.
